ASE No. 406 455 00 000
- **Aluminum Kit VAS 6600** Art. No. 41629
ASE No. 406 490 00 000
- **Support Stand VAS 6526/23** Art. No. 42174
ASE No. 406 481 00 000

For more details on the VAS 6526-6527-6528 systems, please contact your Area Sales Manager

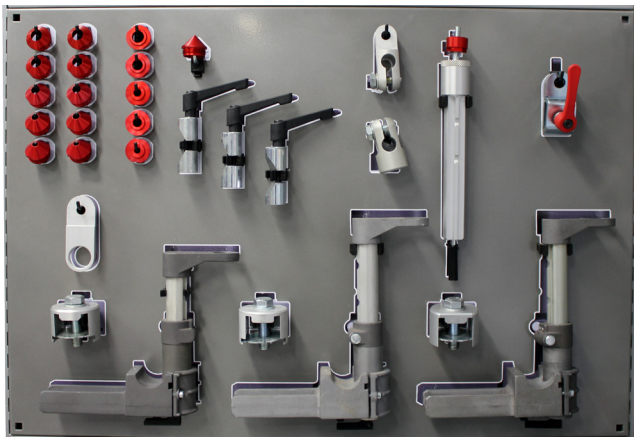

Optional Car-O-Liner Equipment*

Collision repair shops that have the capability to perform aluminum repairs will have a clear advantage over their competitors. Car-O-Liner offers a wide range of aluminum repair solutions to help your PORSCHE repair shop reap the benefits from providing their customers with professional aluminum repair.

EVO3 ALUMINUM

Safe and secure aluminum anchoring

This aluminum holding kit includes additional components for aluminum repair and complements the universal EVO 1 and EVO 2 anchoring and holding systems.

- Perfect aluminum holding for your aluminum vehicle - safe, secure fixturing during repair
- Fast - quick and easy set-up saves time and money
- Can be stored on our dedicated EVO3 aluminum tool board

CURTAIN SECTIONS

Create isolated aluminum repair areas

Car-O-Liner's heavy-duty, non-combustible curtain walls minimize the risk for contamination during the aluminum repair process.

**Not included in Porsche approval*

ALUMINUM WORKSTATION

One solution meets all alu-repair needs

Avoid galvanic corrosion by keeping your aluminum repair tools separate. With this dedicated tool storage, you will reduce the possibility of cross-contamination with steel particles, and with a built-in work area you can complete your jobs efficiently in one place.

- Mobile cart with shelving, tool board & work area
- Carbon Fiber Pull Bar Dent Pulling System with 6 jaws, 50cm, 100cm & 160cm
- Aluminum Spotter & Hand Puller
- 4 professional grade aluminum hammers
- Threaded pull washers with 4mm studs

JOINING AND HEATING*

CMI273 Pulse CMI273 Twin Pulse

CMI3000II

- **Saves time** — synergic pre-set welding programs
- **Reliable & precise** — feeds soft wires like aluminum with a 4-wheel wire feed system CMI273
- **Convenient** — adjust the weld setting right from the torch
- **Large, user friendly controls** — allow technician to focus on welding
- **Efficiently switch between key materials** — with the Twin Wire Feed System on CMI273 Twin
- **Access hard-to-reach places** — with adjustable MIG-A twist torch
- **Protects heat-sensitive metals** — Auto-Pulse (CMI273) and Quatro Pulse (CMI3000II) technology

PNP90 Riveting Tool Kit

- **Universal** — allows for attachments for various applications:
 - Riveting
 - Punching
 - Pressing Out
 - Calibrating
- **Highly efficient** — pressure ratio of 100:1
- **Precise** — control the strength of impact
- **Sturdy construction** — low maintenance

CH37 Induction Heater

- **Fast** — quickly heats exactly where desired
- **Precise** — will not damage nearby heat sensitive parts
- **No open flame** — safer and more economical than gas
- **Total power control** — unique regulation and control system
- **No preparation required** — heats through rubber, plastic, glass, paint, etc.

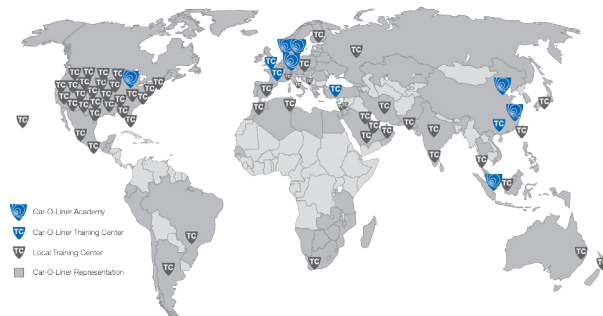

*Not included in Porsche approval

Comprehensive Training in Aluminum Repair Techniques

In order to meet industry standards and OEM requirements, Car-O-Liner Academy has developed a two day course in Cosmetic Aluminium Repair for collision repair technicians. This course covers methods and equipment for cosmetic repair of aluminium panels, using tools such as induction heaters, aluminium spotters and MIG welders.

For more information on our international Academies and courses see:
